## AUCTIONEERS FOREWARD

The Pearce family have made the decision to cease milk production at Shelton Under Harley Farm, Whitmore and concentrate on other areas of the business, for this reason we are going to disperse the Shelton herd in two portions, at Market Drayton both evenly split in profile. The cows are good on inspection; well balanced cows with good udders and sound legs and feet, these cows have the ability to produce large volumes of milk if required.

Great sires have been used throughout the herd, as the herd was all registered pedigree until only a few years ago, the great breeding has passed through and is certainly evident on inspection.

The cows have passed their required TB pre movement test, the cows are milked twice daily through a herringbone parlour, a semi TMR ration is fed at the barrier and during the summer months the cows graze at pasture.

The cows follow an all year around calving pattern and there is something for everyone here and every effort should be made to be at Market Drayton to secure some honest sound cows.
